Faber & Faber. 1 Paperback(s), 2012. soft. Book Condition: New. In this visionary work, TED Prizewinning physicist Neil Turok explores the great discoveries of the past three centuries, from the classical mechanics of Newton and the nature of light to the bizarre world of the quantum, the evolution of the cosmos, and even the recent findings of Higgs bosons at the Large Hadron Collider. Each new discovery, notes Turok, has yielded new technologies that have transformed society. Now, he argues, we are on the cusp of another major change: the quantum revolution that will supplant our digital age. Facing this new world, Turok calls for creatively re-inventing the way advanced knowledge is developed and shared, and opening access to the vast, untapped pools of intellectual talent in the developing world. 292.
