By National Academy of Engineering

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 72 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1990-12 edition. Excerpt: . . . returned to the Chemical Engineering Department of the University of Michigan in 1936, rose rapidly through the faculty ranks to professor, and was chairman of the department from 1951 to 1962. Forty-five doctoral students completed their theses under his supervision. Beginning in 1959 he directed two major national studies on the use of computers in engineering and engineering design education, with support from the Ford Foundation and the National Science Foundation. These projects involved participation of some two hundred engineering faculty members from more than fifty engineering schools. The reports, recommendations, and literature produced have had a national and international impact on engineering education. Professor Katz travelled widely, contributing to improvement of graduate chemical engineering programs with seminars and workshops, particularly in the Far East, India, and Brazil (he spent a semester at the University of Brazil assisting in the inauguration of a new...
